Strategic Business Plan and Coaching Service Explained

*As a Professional Business Coach, Marie Holliday, AAS, BA, MS, CEAP will help clients change in the way they wish and help them go in the direction they want to go. My coaching sessions will support clients at a specific level in achieving an identified goal, as indicated in the strategic **business plan**. Each coaching session will build awareness, empower choice and lead to change. The primary focus of each coaching session will be to focus on helping clients to unlock their own potential, rather it is to *develop their initial business plan, to update their existing business plan, or to create an initial business plan for writing a book, or to create an initial business plan for starting a YouTube Channel. Simply put, Coaching involves the belief that people have the answers to the questions they are seeking within them, the role of the Professional Business Coach is to simply help the person to unlock those answers.**
